

Part II – Project Brief, Multimedia Piece, and Reflection (70%)

Due: December 10

This phase moves from learning to making. You will design an original *interactive* media piece — something that invites user participation, decision-making, or exploration while communicating a clear idea, emotion, or message.

Your project might take the form of a simple app prototype, a browser-based experience, a branching story, a short interactive game, or a conceptual hybrid that blends sound, image, text, and user input.

Your work includes three interconnected components that mirror real creative-production practice: planning, creating, and reflecting.

Project Brief (10%)

Write a concise brief defining your concept and interactive direction, similar to a short design or production pitch.

Include:

- **Objective / Purpose** – What experience or action do you want the user to have?
- **Target Audience** – Who is it for? What responses or behaviors do you hope to evoke?
- **Core Concept / Message** – The single takeaway or feeling you want the experience to communicate.
- **Interaction Model** – How the user participates (choices, movement, input, voice, etc.).
- **Tone & Aesthetic Direction** – Desired mood, pacing, or visual/aural atmosphere.
- **Toolset & AI Integration** – Which platforms or AI models (e.g., Figma, ChatGPT, Gemini, Grok, Midjourney, Runway, Veo, Sora, etc.) you will use, and how they support your creative intent.

The brief should be practical and actionable — something another creator could follow. Begin drafting while prototyping interactions; your idea will evolve through iteration.

Rubric (10 Points Total)

Level	Description – Clarity & Strategic Focus	Points
4 – Exemplary	Defines a clear concept, audience, and purpose; strong alignment between message, interaction, and design tone.	10 pts
3 – Proficient	Purpose and audience mostly clear; minor inconsistencies in tone or interactivity.	8 pts
2 – Developing	General idea present but lacks clarity or strong user focus.	6 pts

Level	Description – Clarity & Strategic Focus	Points
1 – Beginning	Unclear, incomplete, or generic concept; lacks focus or feasibility.	4 pts

2. Multimedia Piece (50%)

Create your final interactive work based on your brief. You may use any combination of traditional or AI-powered production tools (e.g., Figma or Framer for prototyping; ChatGPT or Gemini for narrative scripting; Midjourney, Runway, or Firefly for visuals; Veo or Sora for motion; ElevenLabs or Soundraw for audio).

Your process should be iterative, not linear — prototype, test, and refine in short cycles. Experiment with flow, navigation, pacing, color, and responsiveness. Adjust how sound, text, and interaction guide attention. Gather feedback and iterate until your concept feels coherent and responsive.

Your interactive piece should:

- Demonstrate functional interaction — some element the user can click, choose, or explore.
- Show coherent integration of media modes (sound, image, text, animation).
- Convey a consistent tone or emotional rhythm.
- Reflect ethical and intentional AI use with transparent attribution.
- Communicate a distinct point of view and thoughtful authorship.

Rubric (50 Points Total)

Criterion	Exemplary (12.5 pts)	Proficient (10 pts)	Developing (7.5 pts)	Beginning (5 pts)
Creative Clarity & User Focus	Clear, intentional concept; strong connection to user experience and purpose.	Concept clear; audience focus implied; minor gaps.	Idea partially formed; limited understanding of user engagement.	Unclear concept or weak interactivity.
Integration of Media & Interaction	Seamless blend of modes and mechanics; each element reinforces experience.	Mostly cohesive; small inconsistencies.	Modes or interactions occasionally conflict.	Weak or fragmented integration.

Criterion	Exemplary (12.5 pts)	Proficient (10 pts)	Developing (7.5 pts)	Beginning (5 pts)
Aesthetic Quality & Flow	Strong rhythm, pacing, and design balance; composition enhances engagement.	Generally well-paced and organized.	Uneven structure or flow.	Disorganized or confusing to navigate.
Ethical Integrity & Authorship	AI use transparent and appropriate; demonstrates control and originality.	Mostly appropriate AI use; minor attribution issues.	Limited reflection on AI or unclear authorship.	Misleading or unethical use; lacks creative control.

3. Reflection (10%)

Write a reflection addressing:

- How your work applied or challenged specific best-practice principles.
- Which AI personas or frameworks you used — and why.
- When and why you chose not to use AI.
- How experimentation and revision shaped the outcome.
- What you learned about authorship, decision-making, and creative process.

Rubric (10 Points Total)

Level	Description – Depth of Reflection & Self-Awareness	Points
4 – Exemplary	Thoughtful, specific analysis of process, AI-framework use, and iteration; demonstrates insight and growth.	10 pts
3 – Proficient	Reflects on key decisions and learning; some	8 pts

	discussion of AI or iteration.	
2 – Developing	Describes process but lacks depth or analysis.	6 pts
1 – Beginning	Minimal reflection; little awareness of process or learning.	4 pts
